IN THE CLAIMS:

Please cancel claims 9 and 14 without prejudice or disclaimer of subject matter and amend claims 1, 10, 11, 15-17, 20 and 23 as follows. The following is a complete listing of the claims, and replaces all earlier versions and listings.

1.   (Currently Amended) A rippled wafer ~~formed~~ comprising a plurality of non-concentric convolutions of a convoluted wafer ribbon, the rippled wafer having an average of at least 12 turns/cm^2 of cross sectional area, wherein a turn is a change in direction of the wafer ribbon of at least 45° and the cross sectional area is the volume of the formed wafer divided by the length of the formed wafer.

2.   (Original) A rippled wafer according to claim 1 having an average of at least 15 turns/ cm^2.

3.   (Previously Presented) A rippled wafer according to claim 1 having an average of at least 20 turns/cm^2.

4.   (Previously Presented) A rippled wafer according to claim 1 having an average of at least 25 turns/ cm^2.

5.   (Previously Presented) A rippled wafer according to claim 1, wherein a turn is a change in direction of the wafer ribbon of at least 90°.

6.   (Previously Presented) A rippled wafer according to claim 1, wherein a turn is a change in direction of the wafer ribbon of at least 135°.

7.   (Previously Presented) A rippled wafer according to claim 1, having a ratio of cross sectional edge length-to average cross sectional area of greater than $2/r_e$.

8.   (Previously Presented) A rippled wafer according to claim 1, having a ratio of cross sectional edge length to average cross sectional area of at least $4/r_e$.

9.   (Cancelled)

10.   (Currently Amended) A confectionery product comprising a rippled wafer ~~formed~~ comprising a plurality of non-concentric convolutions of a convoluted wafer ribbon, the rippled wafer having an average of at least 12 turns/cm^2 of cross sectional area, wherein the turns are substantially uniformly distributed across the cross section of the rippled wafer, where a turn is a change in direction of the wafer ribbon of at least 45° and the cross sectional area is the volume of the formed wafer divided by the length of the formed wafer.

11.   (Currently Amended) A confectionery product according to claim 10, comprising a three-dimensional rippled wafer formed in a single step.

12.   (Previously Presented) A confectionery product according to claim 10, wherein the ratio of the cross sectional edge length to the average cross sectional area of the rippled wafer is greater than $2/r_e$.

13.   (Previously Presented) A confectionery product according to claim 10, wherein the ratio of the cross sectional edge length to the average cross sectional area of the rippled wafer is at least $4/r_e$.

14.   (Cancelled)

15.   (Currently Amended) A confectionery product according to claim ~~14~~ 10, wherein the rippled wafer has an average of at least 14 turns/ cm^2.

16.   (Currently Amended) A confectionery product according to claim ~~14~~ 10, wherein the rippled wafer has an average of at least 20 turns / cm^2.

17.   (Currently Amended) A confectionery product according to claim ~~14~~ 10, wherein the rippled wafer has an average of at least 25 turns/ cm^2.

18.   (Previously Presented) A confectionery product according to claim 10, wherein a turn is a change in direction of the wafer ribbon of at least 90°.

19.   (Previously Presented) A confectionery product according to claim 10, wherein a turn is a change in direction of the wafer ribbon of at least 135°.

20.   (Currently Amended) A confectionery product according to claim [[9]]10, further comprising a soft layer at least partly surrounding the rippled wafer and a hard shell.

21.   (Original) A confectionery product according to claim 20 wherein the soft layer is a fat-based cream.

22.   (Previously Presented) A confectionery product according to claim 20, wherein the hard shell is chocolate.

23.   (Currently Amended) A moulded confectionery product according to claim [[9]]10.

24.   (Previously Presented) A petfood comprising a rippled wafer according to claim 1.

25.   (Cancelled)

26.   (Cancelled)
